

Biography

Yi-Chen Chiang Senior Sustainable Investing Analyst, Sustainable Investing

Yi-Chen is a Senior Sustainable Investing Analyst, responsible for Manulife Investment Management's environmental, social, and governance (ESG) research, integration, and engagement activities with the primary focus on South and Southeast Asia.

Yi-Chen specializes in sustainability and sustainable finance. Prior to joining Manulife Investment Management, she was the director, Sustainable Finance at Oversea-Chinese Bank, where she advised and executed sustainable finance transactions, including green/ sustainability-linked loans and green/ social/ sustainability/ sustainability-linked bonds, together with corporates across real estate, utilities, commodities, and transportation sectors in the Asia-Pacific region. Yi-Chen also gained extensive experience in integration ESG in the investment and financing perspective during her time at a Singapore-based private equity fund and the Dutch development bank, with a core focus on renewable and infrastructure assets in emerging Asia markets.

Yi-Chen holds a Master of Science in Management of Technology from Delft University of Technology, Netherlands, and a Bachelor of Science in Electrical Engineering from National Cheng Kung University, Taiwan.
